

Poly Vinyl Creations

BaSteel Perimeter Systems™, distributed via Poly Vinyl Creations, feature precision roll formed, ultra high-strength pickets, rails and posts—all galvanized for superior corrosion resistance. BaSteel then applies a two-coat, thermo cured paint system consisting of a primer bottom coat and a fluoropolymer Kynar 500® top coat that will resist fading, chalking and peeling for decades to come.

BaSteel Perimeter Systems™ offers custom heights, widths and colors to suit your applications needs. We can also consult on any custom solution to your project needs!

BaSteel Perimeter Systems is made-in-USA and offers a quality that remains an unrivaled value over time.

Whether a dumpster, gate application or entire perimeter, we are here for any of your commercial & industrial needs!
