

BaSteel Perimeter Systems & Dumpster Enclosures

- Heights up to 12' high
- Standard sections are 8' nominal in length and include the required number of horizontal rails, vertical panels and necessary hardware for assembly. Custom sections are available in lengths shorter than 8' or longer up to 10'.
- Appearance of privacy paneling installation is identical on both sides, with no "front" or "back" facing differences.
- Paneling is designed as a horizontal rail and vertical roll-formed panel construction.
- Paneling can be configured in a shadow box design, which allows for better airflow in high-wind areas, or a total privacy design, which allows for minimal airflow.
- Posts are ASTM A-1011 and 3' in length in excess of panel height to allow in-ground anchoring.
- Horizontal rails and vertical panels are galvanized to G-90 specifications. Posts are Allied Zinc Flo-Coat® galvanized conforming to ASTM B-6 specifications.
- Panels are bonded with Kynar® High-Performance Fluoroceram color coating, oven-baked over a primer coat. Standard finish colors are Patrician Bronze, Desert Sand, Canyon Brown, Cinder Black, Polar White, and Bronze. Custom colors are available.
- Horizontal rails, posts, gates and all hardware—with the exception of nuts and bolts—are finished with oven-baked polyester powdercoat paint.
